## Pattern Construction ( Garment construction )

You will draft a block to your own size or to a standard size 12. You will then cut and sew the block in calico and learn to make fit adjustments. Using the full scale and quarter scale block you will learn pattern manipulations to create a range of skirt features including moving darts, turning darts into seams and adding flare. You will then go onto learn other techniques such as creating pleats- knife pleat, box pleats, inverted pleats, gathers, frills and a flounce, yokes, facings and waistbands. **Cutting course includes cutting a dress, trousers and shirt if your quick this will also include a jacket block but not tailored**

Pattern Cutting Techniques and Processes

## Design ( Illustration )

Our Fashion Drawing courses cover all the types of drawing a designer would do and can be done for pleasure, to help you get your creative ideas on paper, or to put together a portfolio of fashion art for work or college. They will introduce you to techniques and the use of different materials and build confidence in drawing. It covers materials and media, sketching, design drawing, fabric representation and you will develop templates and techniques that can help when producing fashion designs and illustrations. For those wanting to produce technical drawings for their designs to put into production this is also part of the course.
